

Cost Savings for Police Fleet Operating Budgets *Immediate and Measurable Savings*

Fleet Filter Kit
Product Information

Transmission Kit **\$195**
Engine Kit **\$195**

Our extensive study with severe duty vehicles, in conjunction with Ford Motor Company, demonstrated a safe extension of oil drain intervals to **15,000 miles** while maintaining the fluid integrity. The NTZ Police Fleet Filter Kit can be utilized on any gas engine application.

IMMEDIATE BENEFITS:

- Improved fuel economy (3-4% Savings)
- Reduced maintenance costs
- Quick return on investment (ROI)
- Longer life of engine / transmission
- Reduced Carbon Footprint
 - Reduced Emissions (EPA Greenhouse Gas)
 - Reduced oil disposal (environmental)

Engine Test Data Indicated:

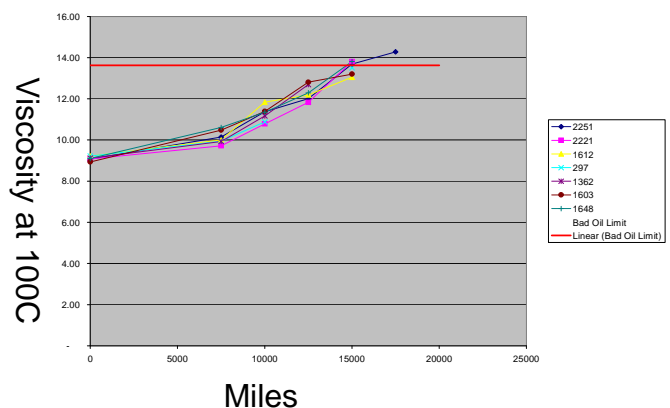

- Viscosity at 15,000 miles was still below allowable limit (<13.8)
- TBN at 15,000 miles was within spec (>1.0)

Transmission Test Data Indicated:

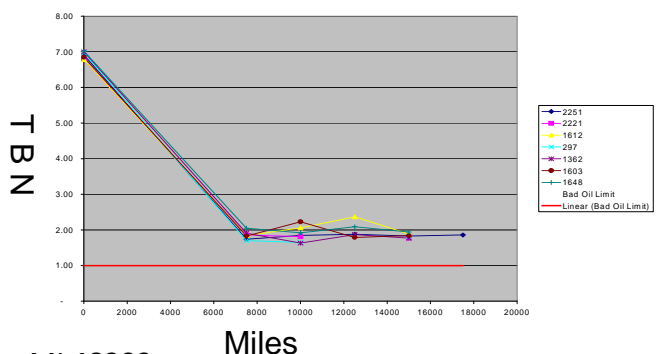

- SAE Paper 2001-01-0867
- Transmission oil change interval to 100,000 miles with NTZ filter change at 50,000 miles.

“The Department of Energy accepts NTZ filters as part of the EECBG grants, given their ability to reduce fuel and oil consumption”, Michelle C. LaRue, DOE Energy Efficiency and Conservation Block Grants (EECBG) 202.287.5537 michelle.larue@ee.doe.gov
